LOS ANGELES Cal. April 2 (By International News Service)—Fifteen distinct species of plant life growing on Catalina and found nowhere else in the world, are reported by Dr. Charles Frederick Millspaugh, eminent Chicago botanist, after two months of research work on the island. Dr. Millspaugh is collecting specimens for the Chicago Pield Museum of Natural History, of which he has been the head for 25 years. "There are three classes of pisnis on the Island," said Dr. Millspaugh. "Those natural to it, those that have been introduced through the agency of man and those which have been transplanted to 1 through the agency of birds and winds.

"Practically all of the plant life I have found on the island differs entirely from that on the mainland. Among the laland flora which I have see far found, and which is tarrely if ever found of and which is tarrely if ever found and which is tarrely if

ID you ever notice how some days you bake a cake so much better than others?

You haven't changed - it's the dairy milk, which varies from day to day in solid content and in acidity. No wonder your cakes vary.

When you use Every Day Milk you are always sure, for Every Day is always the same - and always has the same delicious cream-like flavor. It is milk with the cream left in. Nothing has been removed but water - nothing at all has been added.

Every Day Milk is more economical, because you get less water and more milk. It goes farther.
